Tobi John Bello

Senior Product Designer & Design Engineer · AI Products, Creator Tools & SaaS
tobijohnbello@gmail.com · Portfolio: tobibello.pages.dev · LinkedIn

PROFESSIONAL SUMMARY

Senior Product Designer and Design Engineer with 7+ years designing and shipping SaaS and AI products: 15+ products shipped, used by 8M+ people. I design agentic AI workspaces, no-code builders and data-heavy dashboards, and prototype in working code with AI build tools (Claude Code, Bolt, Lovable) to test ideas before engineering starts.

Currently designing creator tools at Selar, a commerce platform with 3M+ users. Previously led design of Chatblocks at MarketingBlocks AI, cutting campaign creation time by 45%. I have also worked as a Product Manager and co-founded a UX studio, so I am comfortable deciding what to build with founders and engineers, as well as how it should work.

CORE SKILLS

Design: UX/UI design, AI and agentic UX, LLM-powered products, conversational interfaces, no-code and page builders, mobile apps (iOS and Android), responsive web, dashboards and data-heavy UI

Research and strategy: user research, usability testing, UX audits, information architecture, user flows, wireframing, product strategy, product management, cross-functional collaboration

Design engineering and tools: design systems, prototyping in code, design-to-engineering handoff, Figma, Framer, Claude Code, Bolt, Lovable

EXPERIENCE

Selar — Senior Product Designer (Contract)

Jun 2026 – Present · Remote · Creator commerce platform with 3M+ users

- Designed a mobile editing model built on bottom-sheet panels, giving creators the full Page Builder on a phone screen.
- Designed the Link-in-Bio tool for web and mobile with 24 templates. It shares one content structure with the Page Builder, so creators can turn a link page into a full page without starting over.
- Documented 30+ page elements (content, styling and settings) as a clear specification for engineering to build from.
- Work directly with the founder and CEO to turn open-ended requirements into concrete design directions, with clear reasoning behind each recommendation.

MarketingBlocks AI — Senior Product Designer

Mar 2023 – Mar 2026 · Remote (United States)

- Led end-to-end design of Chatblocks, an agentic AI workspace where marketers research, create, publish and distribute content in one conversation, cutting campaign creation time by 45%.
- Made the case for merging the company's separate marketing tools into this single workspace, which became the core product direction.
- Designed a two-panel layout pairing the AI chat with a live visual editor, so users can plan and edit without losing context.
- Designed multi-agent workflows that automate content creation and distribution, including an Auto DM Manager and an AI content calendar for multi-channel scheduling.
- Defined the core AI interaction patterns (visible progress, approval steps, in-context editing) that made generated output easier to trust and correct.
- Redesigned generation flows for AI video, voice-over, image creation and product listings.
- Designed a responsive no-code builder for landing pages, funnels and forms that pairs freeform design with smart containers, which turn any layout into clean, responsive HTML and CSS. Now live and used by business owners and marketers.
- Worked with product, engineering and growth to simplify core workflows, contributing to a 20% increase in user retention.

Case study: Chatblocks · No-Code Page Builder

Gotedo — Product Designer (Contract)

Mar 2022 – Sep 2024 · Remote

- Designed Gotedo Vineyard from concept to MVP in 7 months: one SaaS platform for membership, giving, events and analytics that replaced the spreadsheets, WhatsApp groups, Google Forms and paper registers churches relied on.
- Designed the iOS and Android apps, focused on member engagement and community interaction.
- Led UX for Gotedo Impress, a live presentation and broadcasting tool, defining how dual-screen sync, media queues and live content controls work.
- Built modular design systems shared across Gotedo's products, working closely with engineering.
- Led product branding, landing pages and marketing UX to support adoption.

Case study: Gotedo Vineyard

McAnderson Institute of Technology — Product Manager, previously Product Designer (Part-time)

Aug 2020 – Dec 2023 · Abuja, Nigeria · EdTech organisation running an African Development Bank–supported digital-skills programme across four countries (19,000+ applicants)

- Promoted from Product Designer (Aug 2020 – Dec 2021) to Product Manager (Jan 2022 – Dec 2023).
- Redesigned the learning management system, which scaled from Nigeria to Kenya, Senegal and Côte d'Ivoire with African Development Bank support.
- Designed student and tutor dashboards for learning, progress tracking and grading, with analytics that flag at-risk learners early so tutors can step in.
- Wrote the UX design curriculum and taught live sessions, mentoring 300+ emerging designers.

BookingsAfrica — Product Designer

Jan 2021 – Jun 2021 · Pan-African marketplace for booking creative talent

- Led design across web and the newly launched mobile app, increasing engagement by 30% (40% on mobile).
- Redesigned onboarding, cutting drop-off by 20% and raising profile completion by 25%.
- Simplified booking, service agreements and checkout for 10k+ users, and added in-app video calls for remote auditions and briefings.

Squarepeg UX Design Studios — Co-Founder & Design Lead

Jun 2019 – Apr 2021

- Co-founded a research-led UX studio and led a team of designers and consultants across client projects.
- Grew annual revenue by 60% over two years while keeping a 95% client satisfaction rate.

SELECTED PROJECTS

FitVision AR Try-On — Lead Product Designer (2 weeks): designed an augmented-reality fitting room with AI body scanning and a real-time Fit Score, so shoppers can check fit before they buy instead of guessing and returning. Case study

MENTORING

ADPList mentor (Feb 2021 – Present): mentor designers worldwide on AI product design, product thinking and design systems, with a consistent 5-star rating.

EDUCATION & CERTIFICATION

B.Eng. Mining Engineering — Federal University of Technology, Akure (2015)

Brand Management: Aligning Business, Brand and Behaviour — University of London (2019)
